Summary

Computer Science student with experience developing full-stack web applications, open-source npm packages, and developer tools. Published three npm packages with over 2,500 combined downloads, focusing on JavaScript, React, Node.js, and developer productivity.

Education

American University of Culture and Education — Tyre, Lebanon

B.S in Computer Science — *Expected Graduation: December 2027*

GPA: 3.30 / 4.00

Experience

TechTalks — August 2026 – Present

Frontend developer intern — *Remote*

- Developed and maintained responsive websites using React.
- Collaborating with a team of developers to build a Sales and Inventory POS for small Merchants.

Open source contribution — July 2026 – Present

open-source — *Lebanon*

- Worked on the freeCodeCamp open source library, Fixed multiple bugs in the library's workshops and fixed documentation.

Projects

StackForge | *JavaScript, Node.js, npm* | GitHub | NPM — May 2026 – July 2026

- Built and published an open-source CLI that scaffolds production-ready frontend, backend, and full-stack projects, eliminating repetitive setup for developers.
- Automates project setup by configuring databases, authentication, styling frameworks, code-quality tools, and dependency management through an interactive CLI.
- Published to npm with 1,000+ downloads, demonstrating community adoption and real-world use by developers.

ModoUI | *JavaScript, React* | GitHub | NPM | Demo — Oct 2025 – Dec 2025

- Created a reusable React component library to help developers build consistent, customizable user interfaces with less boilerplate code.
- Provides configurable components, documentation, and an interactive playground to accelerate React application development.
- Published to npm with 500+ downloads, making the library available for use in external React applications.

MailerJS | *JavaScript, Node.js, npm* | GitHub | NPM — July 2026 – Aug 2026

- Developed a cross-platform command-line tool that simplifies sending SMTP emails to one or multiple recipients directly from the terminal.
- Supports reusable HTML templates, multiple SMTP providers, file attachments, recipient imports, and automated email validation.
- Published to npm with 1000+ downloads, providing an easy-to-use email automation utility for developers and power users.

Technical Skills

Languages: JavaScript, SQL
Frameworks / Libraries: React, Express.js, Chart.js
Core Fundamentals: Data Structures and Algorithms (DSA), Database Design, Object-Oriented Programming (OOP)
Technologies: Node.js, HTML5, CSS3, REST APIs, MySQL, PostgreSQL
Developer Tools: Git, GitHub, npm, Postman, VS Code, Linux, Jira, Notion
